

REPORT ON THE NTE+O MONITORING VISIT TO THE FUSE TEMPUS PROJECT

GENERAL DATA:

The first NTE+O Monitoring Visit to the FUSE TEMPUS project took place at the Rectorate of Belgrade University on 28 November, 2014.

OBJECTIVES:

The aims of the Monitoring Visit were to discuss the progress of project activities, to evaluate how committed the consortium members are to the achievement of the project goals, to assess the exchange of the know-how with the European partners, to analyse all the other relevant aspects of the implementation of the project and to make recommendations for its further carrying out.

OUTCOMES

It has been concluded that:

- the project is being implemented in a good way without any significant delay and that it is expected that the objectives will be reached as planned;
- consortium members are committed and work well together;
- the exchange of know-how with the European partners has been very useful and that the study visits to the EU universities were prepared in an excellent way, so that they could assist the Serbian universities in realizing the project objectives;
- the questionnaires developed for WP1 and WP2 are a valuable instrument for collecting data to be used for realizing the goals of the two given WPs.

A complete list of conclusions and recommendations made on the basis of the NTE+O findings during the Monitoring Visit are available in the document written by Ms. Antonella Giorgio, available on the MNGT Platform.

The Monitoring Visit Attendance List is available at the same location as well.
